

PHẠM NGỌC HOÀNG THIÊN

Software Engineer

+84 917 760 199 | hoangthien7702@gmail.com | github.com/HoangThien77 | Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Software Engineer with strong experience in TypeScript, backend architecture, real-time event processing, and hardware integration. Skilled in designing reliable APIs and distributed workflows with NestJS, PostgreSQL, Redis, BullMQ, and Socket.IO. Experienced in production debugging, performance optimization, automated testing, and translating complex business rules into maintainable software.

EDUCATION

HOA SEN UNIVERSITY

Ho Chi Minh City, Vietnam

Bachelor of Information Technology | GPA: 3.0/4.0

Software Engineering, Algorithms, Artificial Intelligence

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, HTML, CSS, SQL
Frontend	React, Next.js, Tailwind CSS, TanStack Query, Shadcn/UI
Backend	Node.js, NestJS, REST APIs, Socket.IO, BullMQ
Data & IoT	PostgreSQL, Redis, HIKVision ISAPI, WebRTC, HTTP Digest Authentication
Testing & Tools	Jest, Vitest, Playwright, Git, Docker

WORK EXPERIENCE & PROJECTS

Software Engineer — AMIT Group

Sep 2025 - Present

Developed enterprise ERP and biometric access-control systems for partner client F100, integrating HIKVision facial-recognition terminals across multiple gym branches.

- Integrated HIKVision terminals through ISAPI, WebRTC, and edge agents for face enrollment, remote gate control, device monitoring, and event ingestion.
- Built a resilient multi-branch FaceID synchronization pipeline with BullMQ, retries, idempotency, failover, drift reconciliation, and automated freeze/unfreeze lifecycle.
- Developed a real-time check-in rules engine and receptionist dashboard covering contracts, debt, bookings, time slots, QR/manual fallback, and multi-station decisions via Socket.IO.
- Optimized terminal face synchronization from 10.5 seconds to 0.5 seconds and maintained approximately 160 automated tests across check-in, ISAPI, synchronization, and recovery flows.

Technologies: TypeScript, Next.js, React, NestJS, PostgreSQL, Redis, BullMQ, Socket.IO, WebRTC, HIKVision ISAPI

Online Flight Booking

Sep 2024 - Dec 2024

A full-stack flight booking application with real-time search, secure authentication, online payments, and an analytics dashboard.

- Implemented real-time flight search and filtering using Google Flights data.
- Integrated Google OAuth with NextAuth and payment workflows through Stripe and MoMo.
- Built a responsive admin dashboard with React Admin and Recharts to visualize bookings, revenue, and user activity.

Technologies: Next.js, NextAuth, Prisma, Tailwind CSS, Stripe, MoMo, React Admin, Shadcn/UI, Recharts

ADDITIONAL

Languages: Vietnamese (Native), English (Intermediate - able to read technical documentation)

Strengths: Problem solving, debugging, system integration, teamwork
